

KSV5035

Permanent Magnet DC Motor

Our high end KSV5035 motor is available with or without worm wheel transmission. The outgoing shaft can be customised and the motor can be equipped with a fully integrated optical encoder (single or dual) or Tacho.

The motor can be used for various applications such as wire feeders for three-phase arc welding power sources, electrical lifting devices, garage doors, agricultural equipment and within the automotive industry.

SWEDEN.MADE.

Specification KSV5035

Armature diameter: 50 mm

Armature length: 35 mm

Nominal voltage: 12 - 42 V

Gear ratio: 24:1 / 49:1

No load speed range: 35 - 250 rpm

Degree of protection: IP20

Insulation class: F

Motor weight: 1,7 kg

Optional encoder: 28 D/60 D&S /100 D&S cpr

Optional tachometer: Yes
